- System Integrators (SI)
- Original Equipment Manufacturers (OEM)
- Component Distributors (CD)
- Original Component Manufacturers (OCM)

Counterfeit Prevention, Detection and Avoidance Elements:

- *Product Traceability*: methods to retain traceability of products from the original manufacturer to the end user.
- *Risk Mitigation*: approaches to assess and mitigate end use application risks of procuring parts from riskier sources.
- *Procurement Practices*: procurement practices developed specifically to prevent the acquisition of counterfeit parts
- *Verification / Detection*: methods applied specifically to detect counterfeits
- *Containment / Disposition*: containment and disposition guidance for use when counterfeits are discovered
- *Reporting*: reporting guidance so that both industry and US Government organizations can determine whether or not they are similarly affected
- *Component Obsolescence Management*: includes guidance to address component obsolescence and, therefore, reduce the likelihood of having to acquire parts through riskier suppliers
